Coding Profiles

LeetCode — CodeChef

Solved 300+ DSA and algorithmic problems across platforms

Objective

Full-stack developer with experience building scalable web applications using React, FastAPI, and AWS. Developed a centralized placement portal serving multiple institutions, improving backend efficiency by 40%. Currently working as an Applied AI Engineer Intern at DevRev, focusing on AI-driven workflows, backend integrations, and automation systems.

Education

B.E. in Computer Science and Engineering, JSSSTU 2022–2026
Mysore, India — CGPA: 9.05/10

Senior Secondary, Kendriya Vidyalaya 2019–2021
Ranchi, India — 88.4%

Experience

Member of Technical Staff Intern (Applied AI Engineering Team), DevRev Oct 2025 – Present

- Worked as part of the **Applied AI Engineering** team, designing and implementing **AI-powered dashboards, workflows, and agents** to automate internal processes and improve system efficiency.
- Built and configured **custom Snap-ins and organization-level workflows**, enhancing product usability and flexibility.
- Worked on **data migration pipelines**, ensuring seamless transition of data across systems with reliability.
- Integrated and tested **REST APIs using Postman**, improving debugging, validation, and backend communication.

Technical Lead, Linux Campus Club (LCC), SJCE 2024–2025

- Led backend and open-source projects; mentored 50+ students on **Git, Linux, and system design concepts**.
- Conducted hands-on workshops promoting **scalable development practices and collaboration**.

Key Projects

Centralized Placement Portal: React, Redux Toolkit, FastAPI, PostgreSQL, AWS

- Designed and deployed a centralized placement platform for 3 institutions, streamlining placement operations and handling thousands of student profiles.
- Optimized backend APIs with pagination, caching, and debouncing, reducing server load by 40% and improving overall system responsiveness.
- Deployed on AWS EC2 with PostgreSQL hosted on RDS, ensuring scalability and reliability during peak recruitment cycles.

HackElite JSSSTU'24 Website: React.js, Tailwind CSS

- Built a responsive hackathon website used by 1000+ participants, supporting registration and real-time announcements.
- Designed an engaging UI with Tailwind CSS and React, achieving 95+ Lighthouse scores for performance and accessibility.

AlgoSortify – Sorting Algorithm Visualizer: Python, Pygame

- Created an interactive tool to visualize sorting algorithms (Quick, Merge, Bubble, Heap).
- Added animations with adjustable speed controls for better learning impact.

Technical Skills

Languages: Java, Python, C, C++, SQL

Web Development: React.js, Next.js, HTML, CSS, JavaScript, Tailwind CSS, Bootstrap

Backend & APIs: FastAPI, Express.js, RESTful APIs, API Integration

Databases: PostgreSQL, MySQL, MongoDB

Cloud Platforms: AWS (EC2, RDS), Linux

Developer Tools: Git, GitHub, VS Code, Postman

Core Areas: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Operating Systems, System Design, Machine Learning, Agile Practices, Team Collaboration, Workflow Automation, Debugging

AI Tools: Applied LLMs (GPT-4, ChatGPT) for debugging, code generation, workflow automation, and AI-driven task automation.
